## INTRODUCTION

The **Indian Type Culture Collection (ITCC)** was established in 1936 with a view to furnish the knowledge on living fungi. It is the largest fungal genetic resource centre in India. ITCC is an affiliate member of the World Federation for Culture Collections (WFCC) and is registered with the World Data Centre for Microorganisms (WDCM, registration number 430). Ministry of environment and Forest, Government of India designated ITCC to act as biological repository during 2007 under Biological diversity Act, 2002.

The main objectives of ITCC are to act as repositories for fungal and bacterial cultures, to provide services *viz.*, supply of authentic fungal and bacterial cultures and identification of fungi and bacteria to technocrats and scientists working in research Institutions, Universities and Industries.

### ACTIVITIES

1. Conservation, Preservation and maintenance of fungal and bacterial cultures
2. Identification and Supply services of fungal and bacterial cultures
3. Deposition of authentic fungal and bacterial cultures
4. Taxonomic Investigations of fungi and bacteria
5. Documentation of the fungi and bacteria

### MAINTENANCE

More than 3,800 cultures of fungi of all groups, *viz.*, Oomycetes, Zygomycetes, Ascomycetes, Basidiomycetes and Deuteromycetes which includes plant pathogens, biocontrol agents, fungi for medical and industrial use including mushroom and yeast and 145 cultures of plant pathogenic bacteria are being conserved and maintained at ITCC.

### PRESERVATION

All the ITCC cultures are preserved as actively growing cultures on agar slants, under mineral oil and isolates producing spores are being lyophilized (freeze drying). Bacteria are preserved in 50% glycerol stock and maintained at -80°C.

### DOCUMENTATION

Catalogues of fungal cultures have been published and revised at regular intervals from time to time.

### SERVICES

#### **Identification of fungal and bacterial cultures**

Identification of different groups of fungi *viz.*, Oomycetes, Zygomycetes, Ascomycetes and Deuteromycetes and plant pathogenic bacteria are done on payment basis for the cultures received from researchers and students of different parts of the country along with the prescribed request form (Annexure I). The report is sent after identification.

### **Supply of fungal cultures**

Authentic fungal and bacterial cultures are supplied as an active culture on an agar and are dispatched by surface mail along with the report within the country while, by air mail outside the country after two to three weeks of receiving the request in the prescribed format (Annexure II).

### **Deposition of cultures**

Fungal and bacterial cultures of Indian origin having some special features (producers of enzymes, toxins, antibiotics), bio-control and newly reported taxa (including new genera, new species, new records) will be deposited at ITCC to ensure *ex-situ* conservation of microbial diversity. The depositors are advised to give the relevant details in the prescribed form (Annexure III) and send the filled form along with the cultures for deposition at ITCC.

### **PAYMENT DETAILS**

The charges for Identification, Supply and Accession of fungal cultures are as under:

<b>Services</b>	<b>Non-Commercial Organizations/University (INR) (Per culture)</b>	<b>Commercial Organizations (INR) (Per culture)</b>
<b>Identification service</b>	1000.00 (Fungi) 2000.00 (Bacteria)	8000.00
<b>Supply Services</b>		
Plant Pathogenic Fungi	600.00	3000.00
Biocontrol Fungi	1000.00	5000.00
<b>Accession services</b>		
Fungal Culture	5000.00	10000.00

An advance payment either by **cash or through Demand Draft** (issued in favor of **ICAR, Unit IARI**, payable at New Delhi) is required for supply and Identification of cultures.

All enquiries about identification and cultures supply should be addressed to:

The Head  
Division of Plant Pathology  
Indian Agricultural Research Institute  
New Delhi – 110 012  
e-mail: head\_patho@iari.res.in

**ANNEXURE I****Request for Identification of fungal/bacterial cultures****Date:****Sender's Address and Email ID:**

Head  
Division of Plant Pathology  
Indian Agricultural Research Institute  
New Delhi

**Subject: Identification of fungal/bacterial cultures - req.- reg.**

Sir,

I request to kindly identify the fungal (No.)/bacterial (No.) cultures up to species level.

The particulars of the cultures are given below:

1. Source of isolation:
2. Place of isolation:
3. Special features if any:

Thanking You,

Yours sincerely,

(.....)

**Enclosures:**

**ANNEXURE II****Request for Supply of fungal/bacterial cultures****Date:****Sender's Address and Email ID:**

Head

Division of Plant Pathology

Indian Agricultural Research Institute

New Delhi

**Subject: Supply of fungal/bacterial cultures - req.- reg.**

Sir,

I request to kindly supply the following fungal (No.) / bacterial (No.) cultures.

The particulars of the cultures required are given below:

<b>S.No.</b>	<b>ITCC No.</b>	<b>Source/Host</b>	<b>Name of the Fungi/Bacteria</b>

Thanking You,

Yours sincerely,

(.....)

**Enclosures:**

### ANNEXURE III

#### Application Form to Deposit the Culture (s)

1. Name of the Isolate:.....
2. Authority of the Isolate:.....
3. Reference to Authority:.....
4. Principal synonyms/Name change:.....
5. Identified by : .....
6. Name of the Depositor: .....
7. Address of the Depositor:.....  
 .....  
 Phone (0) .....(R).....(M).....  
 E-Mail: .....Fax. ....
8. Isolated From (Substrate/Host) Genus .....Species.....
9. Date of Isolation:           Month .....Year.....
10. Isolated by :.....
11. Geographical Location:.....
12. Other Collection Where Held (Give Collection No.)
13. Special Features & Usages -----
14. Published Reference, if any:.. .....  
 (Journal, Volume, Page, Year, etc.)
15. Recommendation for Maintenance & Preservation
  - i) Growth Medium: .....
  - ii) Sporulation Medium, if any:.....
  - iii) Incubation Temperature :.....
  - iv) Incubation Period:.....
  - v) Light/pH Requirement:.....
  - vi) Period between Transfer.....

**Note:** The fungal culture having special feature/usage (item No. 13) only will be deposited at ITCC and number will be given.

**ACKNOWLEDGEMENTS**

Authors are thankful to Dr. Ravinder Kaur, the Director and Dr. K.V. Prabhu, the Joint Director (Research), IARI, New Delhi for providing necessary facilities to maintain the National collection of fungal and bacterial biodiversity. We express our gratitude to Dr. Rashmi Aggarwal, Head, Division of Plant Pathology who has provided sustained technical support, guidance and encouragement. Authors are also thankful to Indian Council of Agricultural Research for financial support.
