

Training on Organic Farming, Natural Farming and Cow Based Economy from 6-10 August, 2018 at village Nisukha, block Bibinagar (Bulandshahar), UP

A training program on Organic Farming, Natural Farming and Cow Based Economy was organized by Indian Agricultural Research Institute, New Delhi during 6-10 August, 2018 at village Nisukha, district Bulandshahr under Pandit Deendayal Upadhyay Krishi Shiksha Yojana sponsored by Indian Council for Agricultural Research, New Delhi.

The concluding day function of the training program on 10th August 2018 was graced by the Joint Director (Extension and Research), IARI, New Delhi, Dr. J. P. Sharma as Chief Guest of the program. Speaking on the occasion, the Joint Director (Extension and Research) underlined the relevance of organic farming in the present context and advocated the application of improved agricultural technology for increasing production and side by side adopting measures for increasing farm income.

The training was organized off campus at the farm center of Sanjeev Kumar, the nodal farmer at village Nisurkha, nominated by ICAR. The training was field based and practically oriented and was attended by 30 farmers from Nisurkha and nearby area.

Among other scientists present on the occasion were Dr. J.P.S. Dabas, In-charge CATAT, IARI and Coordinator of the program, Dr. Neelam Patel, Incharge CPCT, Dr Dinesh Singh, Principal Scientist, Plant Pathology. The scientist interacted with the farmers and made them aware about different improved agricultural technologies viz., bio-fertilizers, bio-control agents, soil and water management practices, protected cultivation technologies etc. which may promote and contribute in organic farming. Pen ultimately, Dr. Nafees Ahmad, Nodal Officer of the program thanked all the participants of the program for their valuable contribution.
